

ADC International is in the field of textiles since 15 years and now it primarily deals with fire protective textiles, fire retardant wear and accessories.

We specialize in the sourcing, supply and development of protective textiles. We have our own manufacturing facility and we produce aluminised fire proximity suits, Aluminised fire approach suits, fire retardant overalls , lightweight fire fighting suits, gloves , Hood and boots for firemen, fire barrier, and many other specialty products. We are also registered with CFEES (Centre for Fire, Explosive and Environment Safety) Delhi and we are actively working with DRDO on Development Projects. Apart from our own facility we have a good network of producers and suppliers to support the development of speciality fabrics.

We have complete facility for design Development and inhouse production of industrial safety products. we are working with products like safety gowns, industrial gloves, personal safety wear; Fire retardant curtains, , bullet proof wear (vest) , , escape chute (used in high rise building & oil rig platform etc)and specialised heat insulation products .

We work with various developments for the Public sector and specialty protective applications. We have our competencies, and we focus entirely on quality and integrity in whatever we do. Our utmost importance is for protection and aim to provide ultimate protection to our fellow human being who save human lives.
